step 1: Paso Uno -- Materiales

El Extinguidor POV CAM no se encuentra disponible en ninguna tienda cercana. El Extinguidor POV CAM se ensambla facilmente usando una camara de video reciclable -las encuentras en CVS o en Duane-Read-, un lente angular .45x, sujetadores de cables, gaffer y un escudo de proteccion facial.

Extinguidor POV CAM

Como usted lo vió en YouTube.

step 2: Paso Dos

Monta el lente angular al lente de la camara de video usando tiras delgadas de gaffer.

step 3: Paso Tres

Con un exacto, haz un agujero cuadrado en el protector de 5cm x 7cm. Aquí es en donde vas a colocar el panel de control de la cámara, desde el interior del protector. Haz otro agujero de 8mm de diámetro de cada lado del visor, que es donde se va a montar la cámara.

Image Notes

1. el panel de control de la cámara

Image Notes

1. hoyo cuadrado

step 4: Paso Cuatro

Monta la cámara en el visor, utiliza el gaffer y los sujetadores de cables para amarrarla bien.

step 5: Paso Cinco

Posiciona la Ext. POV CAM en tu cráneo. Presiona "Record" en tu cámara, direcciona tu cabeza y pinta. Presiona "Record" de nuevo si deseas parar.

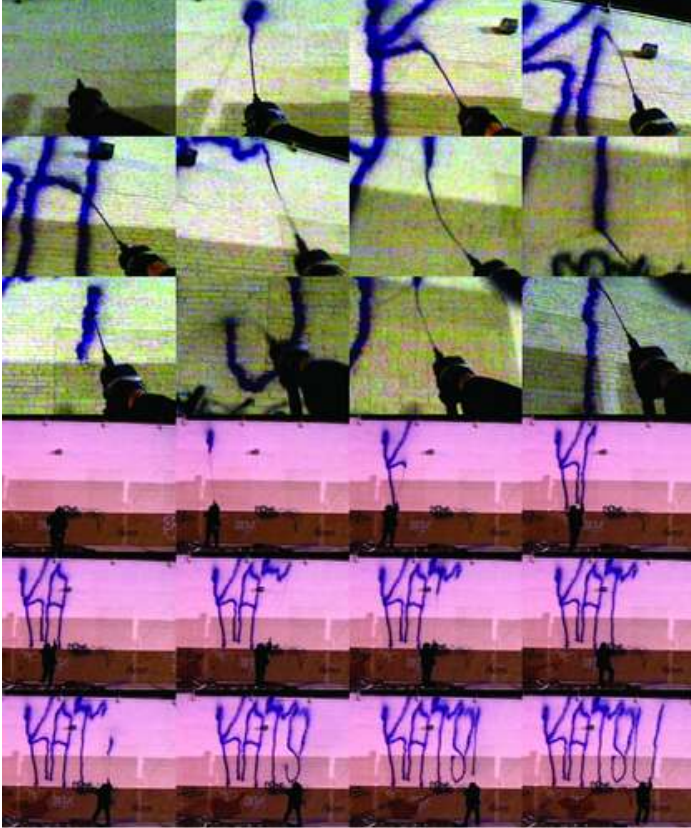

Image Notes
1. "record"

step 6: Paso Seis

Cuando hayas capturado todo tu video, lleva tu camara a un CVS o Duane-Reade que ofrezca el servicio de descargar el material a un DVD, lo cual sera hecho por un tecnico de revelado "en una hora" autorizado. Tambien checa estos sitios para mayor informacion de como hackear las camaras reciclables , de modo que tu mismo puedas descargar el video, cambiar la resolucion y recargarla.

I just love people who like to destroy and deface other's property, but throw a fit if it happens to theirs. Hopefully NYPD gets ahold of this and subpoenas Instructables records to determine the IP address of the person who uploaded the videos to aid in determining who the tagger is.

i just love how you would go out of your way to say that. go post on an instructable about ignorant police officers, it seems you would fit in much better there.

I think it's wrong if the building is in use/nice/plans to be nice/etc. if it is obviously going to be delapidated and blighted housing or building, why not let it become a piece of art, sometimes.

As Seen On Youtube

Are you sick of the paint drops sprinkle over your eyes? you wish that the people see your heroic efforts on painting private property ? If the answer is "YES" , What you need is the NEW POV CAM HELMET Of the graffiti research lab .

This Camera is a inexpensive device , that is mount in your head , designed to capture video of graffiti artists in action , in the eyes of the cam dude , Also protects of the pesky paint droplets and/or of the impact of pressurized paint Or ,well of the NY police Abuses in the face (Ouch)

-We're sorry so much of the lack of accents and Letters in the letter Ã± . It's Instructables Fault because it does not accept all th necessary signs for writing in "Español" (spanish)

Thanks A Lot To Jerry Juarez!

Hope This Helps

JakeTobak says:
Graffiti isn't cool.
Also, you're English is a little off.
