

NO JUSTICE

Informants & Infiltrators

Informants and infiltrators operate in every radical movement. As the government and big business realize that we are serious and that we do not intend to halt our activity, they will send more and more infiltrators amongst our ranks to bribe and entice those weak individuals that are already involved.

In some movements they would have a bullet put through their knee-caps, or worse... In a non-violent movement such as ours we must treat these people with disdain and let them know that their actions will never be tolerated. They will not receive any support from activists, either financial or moral. Some groups like the Justice Department have gone as far as to issue threats and directed attacks against informants in the past (1).

This section is intended to arm you with information on numerous cases along with as much background information as is available in the hope that it will aid all radical activists in sniffing out other informants and infiltrators before any major damage is done. There are a number of cases that have been brought to our attention in countries where actions are taking place (USA, England, Canada) that we are unable to discuss at the moment as details are still being confirmed.

We bring you information on numerous cases along with as much background as we can and hope that it will help you all in sniffing out other informants and infiltrators before any major damage is done.

There are numerous cases that have been brought to our attention in countries where numerous actions are happening (USA, England, Canada) that we cannot bring to light at this moment. As details are still being confirmed as best we can.

Informers Are Everywhere - What to look for and more.

Informants

Usually an activist-turned-informant--either unwittingly or because of pressure put on them by the authorities.

Infiltrators

Someone who infiltrates an organization with the specific intent of getting incriminating evidence against activists or even setting them up to be arrested. These infiltrators are either on the payroll of a government agency or are hired by those in the animal exploitation business.

For more information on recognizing and dealing with informants check our [Physical & General Security](#) section.
