
Stink Bomb Plans

Ingredients:

Ammonia

Sulphur (lots of match heads will work)

glass bottle, zip-lock bag, or something else to hold the mixture in that can be broken easily

What to do:

Cut off the tips of a box of matches (yes, a BOX) or purchase some sulphur from the nearest chemist (or the local sulphur pits)

pour about 8 oz of ammonia into the bottle or other container which you have just placed the match heads into

Seal the bottle quickly

Shake it up and throw it somewhere that it will shatter

Note: You can use other items to create the mixture in, but be warned the mixture of Ammonium Sulfide smells like rotten eggs, so be sure to use something sealable!

Have fun with this one. Open the bottle and leave it in a parked car (not yours), local McDonalds bathroom, or other such venue.

Notes:
